

AUTO TICKET CLASSIFICATION USING FLOW DESIGNER

Module 7 – Email Notification & Testing

Purpose

Notify the caller automatically after the ticket is classified and validate the end-to-end workflow.

Email Action

- Add a Send Email action after classification.
- To: Caller → Email.
- Subject: Your Request for the issue has been submitted.
- Body: Ticket confirmation message.
- Click Done.
- Activate the Flow from the top-right corner.
- **Test 1:** Short Description: WiFi not working in library → Category: Network; Subcategory: WiFi; email is sent.
- **Test 2:** Short Description: Projector not turning on → Category: Hardware; Subcategory: Projector; email is sent.
- Check System Logs → Emails and preview the generated email.

Project basis: uploaded ServiceNow project document.
